

TEAM TRAINING

Modern Excel.

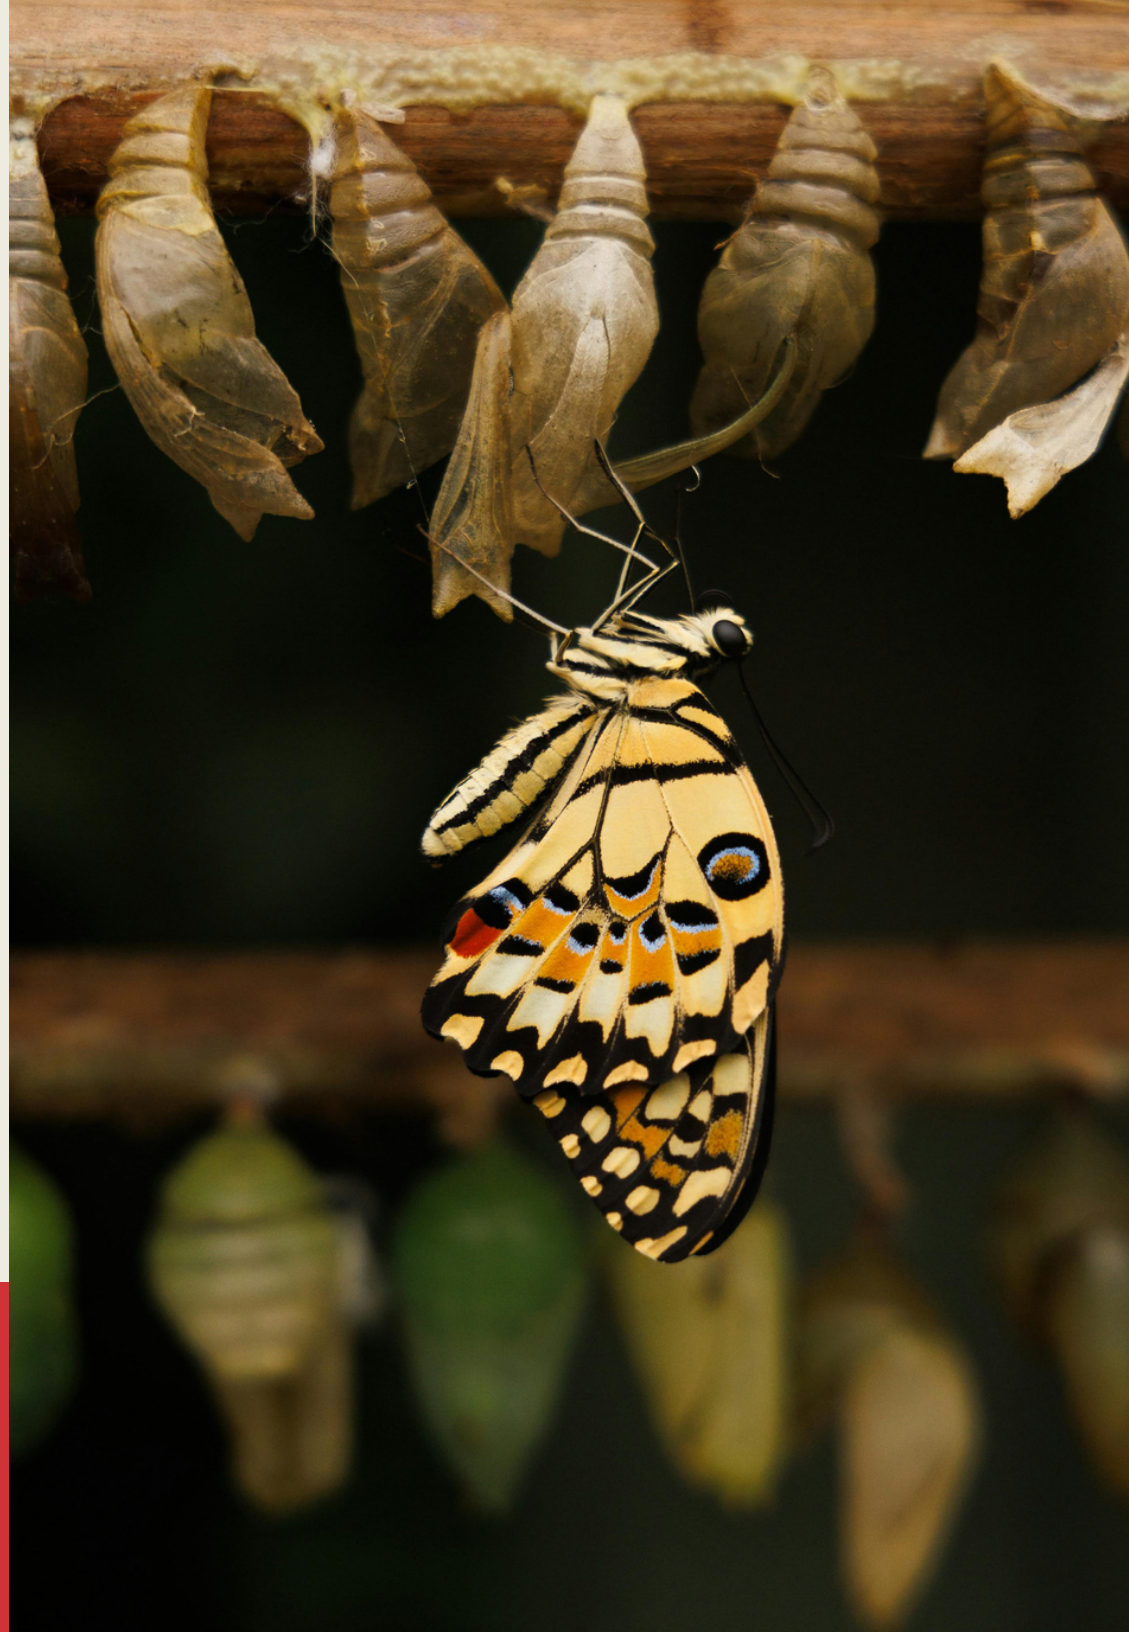

Confident teams.

Practical training in Excel, Copilot and Python,
built around the work your team needs to do.

CASE STUDIES & SERVICE PACKAGES

Real work. Shared skills.
Room to grow.

stringfestanalytics.com/training

From theory to market-data practice.

Early-career analysts brought strong academic backgrounds but limited experience applying modern Excel tools to market data.

THE TRAINING

Through programs for major banks, George taught Python in Excel, Copilot, Power Query and data modeling using pricing data, time-series exploration and trade-level analysis.

A more dependable reporting routine.

An operations team at a U.S. manufacturer was spending too much time on spreadsheet cleanup and report maintenance. George designed a program around Power Query, PivotTables and automated reporting templates.

The result: a more reliable reporting process that saved time and improved accuracy across the team.

Ways to work together.

01

Team workshop

FOCUSED SESSION OR TRAINING DAY

A GOOD FIT FOR

A defined skill or a better way to handle one recurring task.

WHAT WE BUILD AROUND

A focused agenda, demonstrations and guided practice in an agreed tool or workflow.

Power Query, Copilot for Excel or Python in Excel.

02

Team upskilling

2-8 WEEKS

A GOOD FIT FOR

Shared skills, practice between sessions and more consistent working methods.

WHAT WE BUILD AROUND

Sequenced instruction, practice files, applied exercises and progress checks.

A coordinated program across data preparation, analysis and reporting.

03

Modern Excel Transformation

4-6 WEEKS

A GOOD FIT FOR

A workflow your team can redesign, understand and maintain.

WHAT WE BUILD AROUND

Training and workflow design, with templates, documentation and knowledge transfer.

A repeatable reporting process with clear refresh, review and handoff steps.

Start with your team's challenge.

Scope, access, materials, support and fees are agreed before booking.
