

Find your starting point

Choose a focused skill, a learning library, or a live session. Start with the way you prefer to learn and the work you want to do.

01 Build one practical skill

Choose a focused mini-course. Excel + AI foundations: Excel Must-Knows for AI Success. Python in Excel: begin with Quick Wins or the Crash Course.

[Browse mini-courses >](#)

02 Keep learning over time

Explore Modern Excel & AI Skills. A membership with webinar recordings, focused lessons, and available supporting resources. Explore the archive at your own pace.

[Explore the membership >](#)

03 Follow a structured course

Browse George's LinkedIn Learning library. Find courses on Python, Copilot, automation, and modern Excel. Check whether your workplace or library provides platform access.

[View the course library >](#)

04 Learn in a live session

Check public workshops and partner events. Explore upcoming sessions through Eventbrite, O'Reilly, and the Global Excel Summit. Schedules and availability vary.
