

George Mount

AI & analytics speaker

Practical perspectives on how AI is changing analytical work, from someone who teaches these tools for a living.

Conferences · Associations · Company events

FEATURED TALKS

What AI changes about the analyst's job

Explore what to automate, what to verify, and where human judgment matters. Leave with a clearer view of the skills your team needs next.

Beyond the demo: making AI useful

Move from impressive examples to useful business workflows. Learn how to assess a use case, check the output, and choose a sensible pilot.

The future of Excel in an AI workplace

See how Excel, Python, Copilot, and connected tools fit together. Identify where spreadsheets still help and where a different approach makes sense.

Talks are adapted to the audience and event. Live demonstrations can be included by agreement.

A working educator's perspective
