STRINGFEST ANALYTICS / LIVE TRAINING FOR TEAMS

Copilot Cowork training for finance teams

Practical workshops with George Mount

Help your team apply AI to reporting, analysis, and meeting preparation - with clear requests, useful source material, and a process for checking the result.

Built for your team's work

For finance, accounting, and FP&A teams comfortable with spreadsheets and reports. Introductory sessions require no coding experience. We scope the exercises around your goals and the Cowork features your organization can access.

What your team will practice

Brief the task	Define the outcome, audience, inputs, and limits.
Connect the work	Bring spreadsheets, notes, and reporting requirements together.
Check the result	Verify calculations and sources; investigate unsupported conclusions.
Apply the learning	Choose a repeatable workflow and agree on the human review.

Finance scenarios we can work through

Monthly variance reporting / Forecast review preparation / Close coordination

Examples and outputs are agreed during scoping. Exercises can use sample files.

Choose the format that fits

Focused workshop for a defined workflow. **Full training day** for deeper guided practice. **Multi-session program** for applying the learning over time.

Live online or onsite by arrangement. Scope, duration, group size, materials, and fee agreed before booking.

Led by George Mount - Stringfest Analytics founder, Microsoft MVP, O'Reilly author, and LinkedIn Learning instructor.
